

T1SP3/12.5/50/230R

Type 1/2 Class I/II Surge Arrester

The T1SP3 is a three phase, type 1 & 2¹ surge arrester, designed for use on the boundary between LPZs 0 & 1² in structures using TNS, TNC-S and TT earthing systems.

The **T1SP3/12.5/50/230R** is designed for use in structures of LPL II³, such as industrial & administration buildings, schools, supermarkets & cathedrals. The device should be fitted as close as possible to the structures mains entry point.

Remote monitor terminals (RMT)

The T1SP3 range is fitted with 0v remote terminals for connection to a building management or other indication system.

Under normal operating conditions, remote terminal pins 1-2 are closed and 2-3 are open. If the internal varistor component is damaged as a result of thermal overloading, terminations 1-2 will then be open and 2-3 closed.
