ZOMM Series

(Zinc Oxide Military Modules) ZOMM 124/303/1/20

PD Devices Ltd manufacture a wide range of products to protect against the effects of high altitude detonation of Nuclear devices. The result of such an event is the generation of Electromagnetic Pulses which will induce a high voltage transient in exposed conductors.

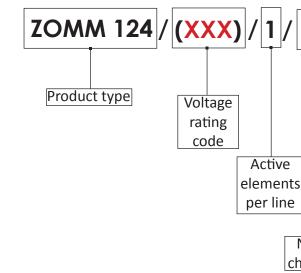

The EMP can affect several thousands of square kilometres, with a magnitude of tens of kilovolts.

This could result in serious damage to insulation, cause breakdown of semiconductors and the consequent malfunction of critical equipment.

Most notable would be the failure of Energy Power Supply and Communications Systems. We offer products to satisfy protection for most applications

Explanation of Order Code

Specification		
No. of channels	20	
50 Shot (4/20μs) Repetitive Duty	ot (4/20µs) Repetitive Duty 300A	
Response Time	<10ns	
Continuous Current per Channel	5A	
Max. (8/20μs) Current per Channel	4500A	
Leakage Current per Channel at Rated Voltage, DC	<50μΑ	
Through Inductance	<10µH	
Volts Drop	Negligible	
Terminations	1mm H.D.H.C. Tinned Copper	
Bushes	PTFE	
Earth Connection	To Base Plate	

 ${\tt PD\ Devices\ reserves\ the\ right\ to\ amend\ specifications\ in\ line\ with\ product\ development.}$

Specification		
Continuous Operating Voltage	AC (rms)	110V
Continuous Operating Voltage	DC	145V
Energy per channel (Joules)	(10/1000μs)	35J
Max. Peak Clamping Volts @	50A (8/20μs)	310V
No. of channels		20
Part Code:		ZOMM 124/303/1/20

Revision: vPD2, 16/05/18
Information subject to change without notice

All of the above information, including drawings, illustrations and graphic designs, reflects our present understanding and is to the best of our knowledge and belief correct and reliable. Users, however, should independently evaluate the suitability of each product for the desired application.
